

Regulation (EC) No. 1907/2006 (REACH)

17.05.2023

Dear Sir or Madam

Our company is a manufacturer and dealer of strands, wire ropes and plastic cordage, in particular ATLAS ropes and DURA Winchline/DURA Float made of polyamide or polypropylene. These products are made of metals and/or plastics.

We are neither a manufacturer, importer nor dealer of chemical substances to which the European Union (EU) Regulation on Chemicals (REACH) applies.

According to a recent review, our products therefore do not come under Regulation (EC) No. 1907/2006 on the Registration, Evaluation, Authorisation and Restriction of Chemical Substances (REACH).

We use operating and auxiliary materials to manufacture our products. These operating and auxiliary materials themselves do not change the material of our products (metal and/or plastics).

A supplier of operating and auxiliary materials subject to registration must furnish proof of preregistration in order to be able to supply us. If the supplier is not the manufacturer/importer of the substance subject to registration himself, but is a dealer, the supplier must clarify whether he can assume that his upstream supplier (manufacturer/importer) has undertaken preregistration.

ppa. Sven Busch
